

# Three Way Valve

Compac's Three Way Valve will ensure top performance and reliable refuelling, every time.

# The Compac Three Way Valve is reliable and user-friendly, ensuring top overall product performance.

The Compac Three Way Refuelling Valve has been developed exclusively by Compac's experienced engineers, to perform to the highest standards in gas flow control.

### → Features of the Three Way Valve

Simply attach the valve to any type of CNG hose to give you and your customers an easy and reliable fill every time.

The model features stainless steel body, a large handle, smooth turning action and rigorous quality control. All of which ensure a long lasting and better performing Three Way Valve.

#### Handle

- Material used for increased strength and impact resistance
- Ergonomical for ease of use
- Lubrication ensures smoother turning action

#### Body

- Stainless steel body for corrosion resistance

#### Internally

- Includes dual encapsulated seals for a longer lifespan

#### Quality Checks

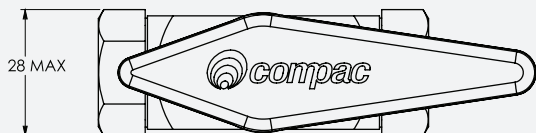

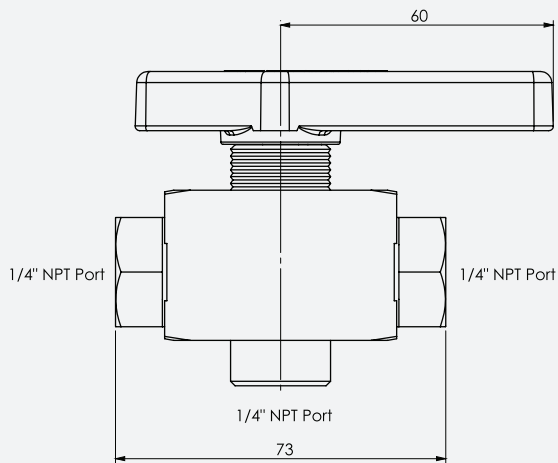

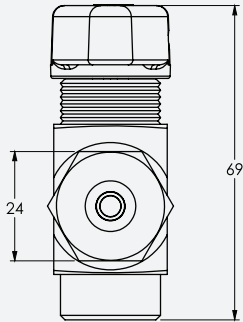

- Includes gas testing and high precision checking of every part, for every valve, to increase overall reliability

### → Advantages of the Three Way Valve

- High flow
- Robust construction
- Reliable and user-friendly
- Corrosion resistant
- Smooth, easy operation
- Fast and easy servicing

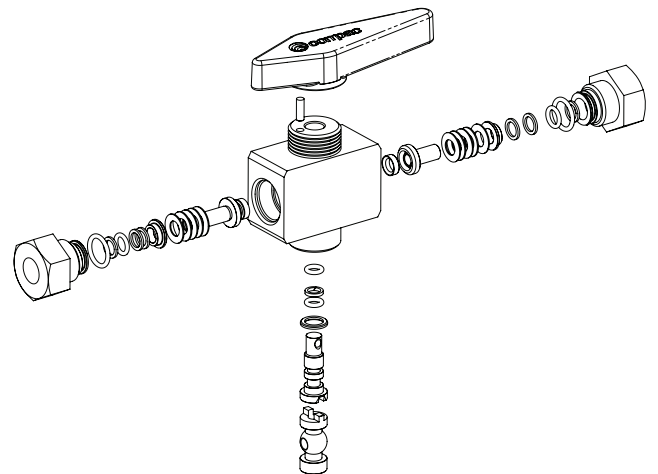

## → Three Way Valve Measurements

### Standard Specifications

Manufacturer	Compac Industries
Model	RVCI-04-SS
Weight	~ 0.4 kg
Connection Ports	1/4" NPT Female
Maximum Inlet Pressure	350 Bar
Nominal Flow Rate	1-20 kg/min
Material Specification	Body - Stainless steel Handle - Plastic GV-5H with aluminium insert Ports - Stainless steel Seals - PCTFE

### Spare Parts

Seal Kit (without Ball or Stem): FC-SK-0048

Ball only: FC-SVK-0002

Stem only: FC-HDLSHFT-0002
