Introduction

Introduction

Compac Online allows for easy management of multiple sites, with 24/7 remote access.

Functions of Compac Online include editing customer databases, managing transactions, tanks and pumps, and retrieving reports from desired sites.

This manual details how to view the volume of tanks, connected to a tank gauge onsite. Tank deliveries can also be added manually if desired. This manual also details how to retrieve tank reports.

IMPORTANT NOTE:

Access to site data is heavily dependent on the equipment being powered on and connected to the internet. Ensure equipment is online and functioning for full access to all site data.

Tanks

The **Tanks** section is an overview of the tank volume connected to the tank gauge on site.

There is a probe on site to collect data from the tanks on site, and is then uploaded to **CompacOnline**.

NOTE: This process is not instant. The changes are updated every 15 minutes.
